

Procedures CY 8602

1. On 15 Jan 86, source #05 was monitored for a CRV session conducted by the operations officer in an attempt to provide information concerning a suspected nuclear event on [REDACTED] SG1A
SG1A
2. Information provided to the monitor was controlled by a series of 3x5 cards (see attached). The monitor read cards 1, 2 + 3 prior to the session. The monitor did not read card 4 until after viewer attained Stage III contact with the site. Source was then instructed to provide information on [REDACTED] (page 10 of transcript). The source worked through Stage IV at which time the monitor read cards 5, 6 + 7. The source did some Stage VI work in an attempt to obtain more information about the "event." During the session the viewer was not told what was on the 3x5 cards. This information was for the monitor's use only.
3. After the session the viewer was provided with available "feedback" - the cards.
